

CLAIMS

What I claim as my invention is:

1. A toilet paper roll holder comprising: a rigid hollow tube whose internal cross-sectional shape and size are suitable to permit insertion and removal of toilet tissue rolls,
 - (a) a removable sleeve covering the outer surfaces of said tube leaving an opening at only one end of said tube,
 - (b) a lining covering the inner surfaces of said tube with a single opening directed towards the open end of said tube,
 - (c) an extension of said sleeve that is folded over the edge of said tube at said opening and covers part of the inner surface of said tube, and
 - (d) reusable fastening means joining the edge of said inner to the edge of the said sleeve.
2. The invention as set forth in Claim 1 wherein the tube has a circular cross section.
3. The invention as set forth in Claim 1 wherein the tube has a polygonal cross section.
4. The invention as set forth in Claim 2 wherein the tube is made of leather board, cardboard or composite material.
5. The invention as set forth in Claim 3 wherein the tube is made of leather board, cardboard or composite material.
6. The invention as set forth in Claim 4 wherein the tube is manufactured with a weight-saving perforated, mesh or open structure.
7. The invention as set forth in Claim 5 wherein the tube is manufactured with a weight-saving perforated, mesh or open structure.
8. The invention as set forth in Claim 4 wherein the tube has one end closed.
9. The invention as set forth in Claim 5 wherein the tube has one end closed.

10. The invention as set forth in Claim 1 wherein the sleeve is made of fur or leather.
11. The invention as set forth in Claim 1 wherein the sleeve is made of woven or knitted or manufactured fabric made of natural or synthetic material.
12. The invention as set forth in Claim 1 wherein the sleeve is stitched, bonded pieces or shape molded.
13. The invention as set forth in Claim 1 wherein the sleeve is constructed to interchange with a vast array of different designs or removing the sleeve for cleaning purposes.
14. The invention as set forth in Claim 1 wherein the sleeve has wall mounting means to provide the option of removeably mounting the holder to the wall.
15. The invention as set forth in Claim 1 wherein the sleeve has a solid or perforated pouch to house air freshener.
16. The invention as set forth in Claim 10 wherein the sleeve has a cover that is removeably attached.
17. The invention as set forth in Claim 11 wherein the sleeve has a cover that is removeably attached.
18. The invention as set forth in Claim 16 wherein the cover is collapsible.
19. The invention as set forth in Claim 16 wherein the cover has a removable outer covering.
20. The invention as set forth in Claim 18 wherein the collapsible cover has two supporting members, one being the circular top support member for the top, the other being the inner side ring support member for the side.
21. The invention as set forth in Claim 19 wherein the sides of the removable outer covering is extended to fold inwardly over the bottom edge of the cover.

22. The invention as set forth in Claim 16 wherein the cover has a cut-out portion of any shape, located centrally on the top of the cover, to permit identifying the contents without lifting the cover.
23. The invention as set forth in Claim 16 wherein the cover has a cover grip to facilitate ease of gripping to selectively open or close the cover.
24. The invention as set forth in Claim 1 wherein the sleeve has legs to avoid direct contact of the bottom of the sleeve with the floor.
25. The invention as set forth in Claim 1 wherein the lining is stitched, bonded pieces or shape molded.
26. The invention as set forth in Claim 1 wherein the lining is made of woven or knitted or manufactured fabric made of natural or synthetic material.
27. The invention as set forth in Claim 1, wherein fastening means consist of reusable velcro or other means.
